

“Where are landscape policies heading?”

15 years of the European Landscape Convention and 10 years of the Landscape Act and of the Landscape Observatory

Sala Cotxeres, Palau Robert, Barcelona,
9 June 2015, 16.00

This year, the European Landscape Convention (ELC), which was promoted by the Council of Europe and approved in Florence in October 2000, celebrates its 15th anniversary. Without the Convention, many political, legislative, professional, research and teaching initiatives in landscape matters that have been developed in Europe since 2000 could not be understood. In addition to this, 2015 also celebrates ten years of Act 8/2005 on landscape protection, management and planning and of the Landscape Observatory of Catalonia. Therefore, it is an ideal moment to take stock of the landscape policies in Catalonia that have been developed over the last decade and look at how they should be focused for the future.

16.00h Presentation of the event

Agustí Serra. Director-General of Territorial and Urban Planning
